This means that if the selected option category has a defined lockout point on the lot's construction schedule, and that point passes before the NSO is released, the status of the NSO will be changed to 'Locked Out' which will prevent any updates to the NSO.</li> <li>The field called 'Manual Override Date' supersedes the selected option category's lockout point.</li> <li>A new NSO permission called 'Override Lockouts' has been added. Only users with a NSO permission role that includes this permission will be able to edit the "Option Category" and 'Manual Override Date' NSO fields.</li> </ul>
